

Pool Cleaning Service

We offer a full pool cleaning service in which we clean your pool weekly. Following are the list of services that we include on an as-needed basis with our weekly service.

1. Test the water for chlorine, pH, and total alkalinity. Other tests are also done as needed such as calcium hardness, cyanuric acid, and salt levels.
2. Skim leaves and debris with a leaf skimmer or leaf rake.
3. Clean out the skimmer baskets.
4. Clean the tile.
5. Brush the walls.
6. Clean the pool using a vacuum or leaf bagger.
7. Clean out the pump basket.
8. Backwash or clean the filter.
9. Add chemicals as necessary.
10. Clean the coping and the deck.
11. Visually inspect the pool equipment area for leaks.

In addition to these cleaning procedures, we visually inspect and tighten bolts on the pool equipment—such as diving boards, pool ladders, and filtration equipment. It will also be necessary to lube o-rings occasionally. This will eliminate any problems before they become too serious.

It is the homeowner's responsibility to keep the water level at least midway into the skimmer. This prevents the pump from running dry and malfunctioning.

In addition to a weekly pool cleaning service, we also provide a pool cleaning service while you are on vacation, or a one-time clean up on your swimming pool.

As a service to our customers, we now offer CPR classes. If you want to know what to do in a life-threatening emergency, the American Heart Association course "CPR for Family and Friends" can help you. With the knowledge and skills you will learn in this course, you may save the life of a loved one, friend, or neighbor.

FREE CPR CLASS

Reservations are limited. However, as classes fill, we will begin scheduling more classes. Call for more information.
