

Endure

Endure, by **Poolife**, is a product that provides many benefits to swimming pool water such as:

- Clear & sparkling Caribbean blue water
- Smooth & gentle feeling water that decreases skin & eye irritation
- Enhances chlorine performance and helps prevent algae
- Helps protect pool equipment and pool surfaces

More Information About Endure:

Endure provides many benefits for both chlorine and biguanide pools. It provides an action that hinders the ability for algae to grow and reproduce. Endure improves the buffering capability of the water and makes it easier to maintain the proper water balance. Swimmers also experience improved comfort in Endure treated pools, with the water feeling softer and smoother to the skin and less dryness noted by many. Endure users experience improved sparkle and blueness of the water.

Endure is ideal for use in all types of swimming pools regardless of surface type, volume, or basic chemical treatment. The benefits of Endure are realized when the proper residual (50 ppm) is maintained for the specific treatment program of the pool. Testing is essential to maintaining the proper range. Endure is lost from the pool through backwashing, splash out, and draining. Monthly testing is recommended although maintenance applications are usually only needed on a twice per year basis.

When applying the initial dose of Endure (3 lbs per 1,000 gallons of water), be sure to follow label instructions. The addition of Endure will produce an increase in pH. Adjustment of pH to within recommended ranges is important for proper operation of all pools.
