

Knowing Your Swimming Pool

In order to care for your pool, it is important to know what type of pool you have, how many gallons, and what type of equipment you have. The following is a chart that will help you document your basic pool information, for your reference and in case a pool technician ever needs it.

BASIC POOL DATA

Builder: _____

Type: _____

Dimensions: _____

Capacity in Gallons*: _____

Date Pool Installed: _____

Sanitizer Type: _____

THE EQUIPMENT**

Pump: _____

Serial #: _____

Filter: _____

Serial#: _____

Backwash Valve: _____

Time Clock or Control System:

Pool Light: _____
(volts & wattage)

Spa Light: _____
(volts & wattage)

Automatic Cleaner: _____

Serial #: _____

Booster Pump: _____

Serial #: _____

Heater: _____

Serial #: _____

Motor: _____

Serial #: _____

Control Valves: _____

Skimmer Type: _____

Lid Color: _____

Diving Board: _____

Slide: _____

**Capacity in Gallons*—Proper determination of pool capacity is critical when it comes to the addition of pool chemicals. You have to know how much water your pool contains so that you can correctly calculate the proper amount of chemicals needed to treat the amount water. The following are formulas for calculating the gallonage based on the dimensions and average depth of your pool:

Rectangle or Square Pools

Length x width x average depth x 7.5 = gallons

If your pool is L shaped, break it down into two sections and use the same formula.

Round and Oval Pools

Length x width x average depth x 5.9 = gallons

Freeform Pools

Average length x average width x average depth x 7.5 = gallons

To figure gallonage on freeform pools, it is easiest to divide the pool into smaller pools, and then find the sum of the figures.

***Equipment Information*—Most of the time, your pool equipment has a label on it that will have the brand name, model number, size, and serial number. If you are having trouble identifying a piece of equipment, take a photo of it
