

# Pool Renovations

Over the years, pools can become outdated and in need of a facelift. Although renovations can occur year round, Fall and winter are the best times of the year to update and renovate your pool, as swimming pool craftsmen are focusing on renovations due to the sea-sonality of the pool construction business. Many of the quality craftsmen prefer to work on new pools when the busy season begins, which is usually February or March, and they remain very busy until August or September.

Some pool owners' desire dramatic overhauls, and many times end up with a pool that looks better than it did when it was new. Other than the shape of the pool, virtually anything is possible with a creative craftsman.

Renovations can include, but are definitely not limited to, filtration equipment replacement, the addition of a heater or automatic cleaner, the addition of remote control systems, vinyl liner replacements, resurfacing with a dark finish which can give your pool that lagoon look, or virtually anything else. One of the good things about pool renovations is that financing is available either through a home improvement loan or a home equity loan.

Finding a dependable, experienced contractor is the key to a successful renovation. We believe that our Service Department here at Gohlke Pools is among the best in the pool industry when it comes to renovating swimming pools. When obtaining estimates from others, be sure to obtain the following information:

- 1. What is their experience with your type of remodeling job?**
- 2. Specifics about the materials that will be used.**
- 3. The process and how long it will take.**
- 4. The length of the warranty.**
- 5. What the warranty will and will not cover?**
- 6. And finally – Ask for references and call or visit pool owners that have had work done by the contractor.**

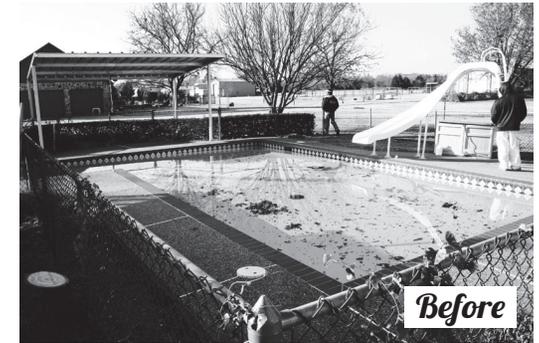

By selecting the right contractor, you will be ready to start the swim season next spring with a “new” pool that should provide many more years of enjoyment.
